Surajpur, Greater Noida, Uttar Pradesh

PROFESSIONAL SUMMARY

MCA graduate skilled in Full-Stack Development, Artificial Intelligence, IoT, and Data Analytics. Experienced in developing secure web applications, AI-powered solutions, and IoT systems using Python, Java, JavaScript, Firebase, MySQL, and REST APIs. Published research work in IoT and passionate about building innovative software solutions.

EDUCATION

Sharda University, Greater Noida — Master of Computer Applications (MCA)	2023 – 2025
Impact College, Patna — Bachelor of Computer Applications (BCA)	2020 – 2023
Bihar School Examination Board — Intermediate of Commerce	2018 – 2020

TECHNICAL SKILLS

- Programming Languages: Java, C, C++, Python
- Web Technologies: HTML, CSS, JavaScript, PHP
- Database: MySQL
- AI/ML: Generative AI, NLP, AI Agents, Prompt Engineering, OpenAI API
- Cloud: Microsoft Azure
- IoT: ESP32, Arduino IDE, DHT11, Soil Moisture Sensors
- Tools & Analytics: VS Code, GitHub, Git, Tableau, Microsoft Excel
- Backend & APIs: Firebase, Firestore, REST API, WebRTC
- Deployment: Vercel, Cloud Hosting Platforms
- Design: Responsive Web Design

PROJECTS

Hamare Raaz — End-to-End Encrypted Chat App

Technologies: HTML, CSS, JavaScript, Firebase, Firestore, WebRTC, Capacitor (Android Packaging), Git, Vercel

- Built a secure real-time chat app with end-to-end encrypted messaging and user authentication.
- Implemented one-to-one messaging, audio/video calling (WebRTC), and chat history management.
- Integrated Firebase for authentication, Firestore database, and real-time data synchronization.
- Deployed on Vercel with responsive UI and packaged as an Android application using Capacitor.

Sensor-Based Smart Agriculture Monitoring System

Published Research | MCA Final Year Project | Technologies: C++, PHP, MySQL, ESP32, Arduino IDE

- Built IoT system using ESP32, DHT11, and soil moisture sensor for real-time environmental monitoring.
- Designed PHP/MySQL web dashboard for remote data visualization and automated irrigation control.
- Research paper published at the 3rd International Conference on AI, Machine Learning & Cybersecurity (2025).

SYRA AI Voice Assistant

Technologies: Python, OpenAI API, SpeechRecognition, pyttsx3

- Developed AI voice assistant with wake-word activation ("HEY SYRA") and real-time speech interaction.
- Integrated OpenAI API for intelligent conversational responses and voice-based system automation.

Bluetooth Controlled Car (ESP32 IoT Project)

Technologies: ESP32, C++, Bluetooth, Arduino IDE

- Built Bluetooth-controlled car using ESP32 with L293D motor driver for full directional control.
- Added headlights, backlights, horn, and hazard light features; controlled via mobile app.

Hotel Management System

BCA Final Year Project | Technologies: Java, MySQL

- Developed Java application for managing hotel operations: room booking, check-in/check-out, and billing.
- Integrated MySQL database for customer records and reservation tracking.

CERTIFICATIONS

- Microsoft Learn: Generative AI, AI Agents, NLP, Azure AI Solutions (Apr 2026)
- Deloitte Australia Data Analytics Job Simulation — Forage (Jun 2026)
- Artificial Intelligence Beginner's Guide — Simplilearn (Apr 2026)
- Java Assessment & Project Management Assessment — LearnTube
- C Programming Basics — Simplilearn
- Secondary Teacher Eligibility Test (STET-BSEB)

ADDITIONAL INFORMATION

- Languages: English, Hindi
- Interests: Learning new technologies, Music, Traveling, Exploring new places
